## TRADERS RAIDED SECURITIES, FORCING PRICES DOWNWARD.

Good Stocks Sold Off with the Less Desirable Ones.

MONEY 10 PER CENT.

Selling of Brooklyn Rapid Transit and Sugar the Most Aggressive. /

Wall Street, Dec. 4. Professionals sold the market off to their own satisfaction to-day, the movement being accompanied by all sorts of reports, many of which were mere conjectures on the part of the pessimistic bears, who see nothing hopeful in the present situation. The first drive at the market was at the Industrial stocks, prior to the decision of the Supreme Court in the Addyston Pipe case, which combination was decided to be in violation of the Sherman Anti-Trust law. The fact that this organization was radically different from any of the recently formed industrial companies and could by no means be likened to the concerns whose stocks are active in the market, dld not appeal to the judgment of the traders. When the traders offered large blocks of the various industrial shares, which were promptly ness of their position was more clearly

In the way of Vague rumors which the traders used as excuses for rather than the cause of their raid on the market, there

Company reports for the quarter ended September 30 gross earnings of \$96,186, an increase of \$13,-810, and net of \$37,904, a decrease of \$616. The Catskill Mountain Railway Company reports for the quarter ended September 30 gross earnings of \$37,695, a decrease of \$1,481, and net of \$21,884, a decrease of \$881.

SHORT INTEREST MUCH EXTENDED.

The short interest was materially extended as the result of the efforts of the bears to depress the stock market. That the stronger interests were not inclined to desire the company of public speculators was clearly shown by the advance in money rates, which was hardly warranted by conditions. It is a good trading market in which professionals can scalp out profits on either the long or short side. The decision in the Addyston case does not apparently affect in any way the recently organized industrial corporations. On the break there was excellent buying of both railway and industrial shares, but even the professionals seem inclined to leave the local traction stocks severely
